

**Role:** Graduate Engineer  
**Salary:** Competitive  
**Possible Locations:** Greenford

Ultra Electronics is specialist electrical and electronics engineering company operating mainly, but not solely, in the defence and other highly-regulated markets. The company has a long, consistent track record of development and growth, delivering mission-specific, bespoke solutions and advanced capabilities to customers all over the world.

Ultra's Communication & Integrated Systems (CIS) business designs and delivers market-leading secure communication systems, intelligence gathering and situational awareness technologies able to withstand the world's toughest environments. We operate as a portfolio of four business units each offering highly differentiated and innovative solutions to our customers.

### IT'S NOT JUST ENGINEERING

Supporting our engineers in the delivery of our bespoke capabilities and technologies are shared Operations, Human Resources, Finance and Marketing Communications functions.

### WHAT ARE WE OFFERING?

- A specialist engineering environment with world class expertise
- Opportunity to work on real engineering projects being delivered to our customers around the world
- Flexibility to focus on one specific area or to work across several different business functions
- Placements that are not only essential to project delivery but also bespoke to your interests and skills
- Maximise your personal development
- Comprehensive training
- Strong career prospects

## PACKAGE

- Full-time contract based on a two-year rotational scheme
- Competitive salary
- Relocation costs
- 25 days holiday (per annum), with the opportunity to buy or sell up to five days

We offer a flexible benefits package with options including a pension plan with flexible employee contributions, critical illness cover, life assurance, private medical cover, dental plans, retail vouchers, cycle to work schemes, golf and gym memberships, and many more.

## WHY ULTRA

### Advanced technology

Encryption technology

Hardware security

Key generation and management

Deployed communication networks

Satellite antennas

Monitoring systems and SCADA

Telemetry

### Personalised career progression

#### Small business environment

Ultra is made up of small individual businesses, this means that you will be known personally by the Managing Director and your graduate scheme will be tailored to suit your individual growth and development, allowing you to have a direct impact on your own career path

### Further career opportunities

#### Being a name and not a number

- You will have a smaller ladder to climb to reach the top of the business
- The ability to move between businesses offers more career opportunities
- Direct support from senior and experienced staff will deliver invaluable insights into your future career prospects

### Stability and growth

#### Flexibility and autonomy

Each Ultra business is set up to operate autonomously. This allows all Ultra businesses to be able to move quickly and flexibly and react to business and environmental needs

## TO APPLY

Please send your CV with a covering letter to:

[recruitment@ultra-cis.com](mailto:recruitment@ultra-cis.com)

Please ensure you tell us in your covering letter where you heard about the scheme. This is your chance to let us know why you want to become part of the Ultra team and tell us what you are passionate about.

Following initial screening you can expect to be assessed via a telephone interview. The final assessment will take place at an assessment centre, with a presentation, group activities and a panel interview.

Please note you must have a minimum of 5 years permanent UK residency to obtain security clearance.

**WE LOOK FORWARD TO RECEIVING YOUR APPLICATION. GOOD LUCK!**
